Replanting Provisions

A replanting payment may be allowed only in counties with both fall and spring planting dates if:

- Fall-planted acreage is damaged by an insurable cause and less than 75 percent of a normal stand remains (a minimum of 9 live plants per square foot will be considered to be a normal stand for loss adjustment);
- It is practical to replant;
- We give written consent to replant; and
- Such acreage is replanted the following spring by the spring final planting date. The replant payment is 50 percent of the determined indemnity.

A replanting payment will not be allowed in counties where the forage seeding was initially planted in the spring. You must replant the spring-planted forage at your own expense, if it is practical to replant.

Loss Example

Assume one basic unit of 50 acres of spring-seeded forage at 65-percent coverage level with a 10 acre fully established stand and 40 acres at 50-percent stand.

\[
\begin{align*}
\text{Insurance amount per acre} & = \$238 \\
\text{Spring-seeded forage acres} & = 50 \\
\text{Protection in force} & = \$11,900 \\
\text{Insurance amount per acre} & = \$238 \\
\text{Fully established stand acres} & = 10 \\
\text{Production-to-count} & = \$2,380 \\
\text{Protection in force} & = \$11,900 \\
\text{Amount of loss} & = \$9,520
\end{align*}
\]
